

CAMP BULLIS REGIONAL CONSERVATION PARTNERSHIP PROGRAM

CONSERVATION EASEMENT FUNDING

The Camp Bullis Regional Conservation Partnership Program (RCPP) is seeking voluntary landowners interested in permanently protecting their property and natural resources from development with a tailored conservation easement. Agriculture, wildlife habitat, and open spaces are compatible land uses that protect the mission and training capabilities of Joint Base San Antonio - Camp Bullis.

Up to **\$3 million** in funding is available for conservation easements, which conserve water resources, agricultural productivity, wildlife habitat, and dark skies.

INTERESTED IN A CONSERVATION EASEMENT?

Landowners in the project area can fill out the Landowner Interest Form to get started. Minimum acreage and site restrictions may apply. Visit our website or contact us for more details. Priority will be based on proximity to Camp Bullis, development threat, connectivity to other conserved lands, and ecologically important elements including waterways and karst features.

CAMP BULLIS REGIONAL CONSERVATION PARTNERSHIP PROGRAM

Regional Conservation Partnership Program

A Regional Conservation Partnership Program (RCPP) is a partner-driven approach to conservation that funds solutions to natural resource challenges on working land. By leveraging collective resources and collaborating on common goals, RCPP demonstrates the power of public-private partnerships in delivering results for agriculture and conservation.

The Camp Bullis RCPP is administered and supported by the Natural Resources Conservation Service (NRCS) and led by the Texas A&M Natural Resources Institute.

Texas A&M Natural Resources Institute

At the Texas A&M Natural Resources Institute, our work improves the conservation and management of natural resources and private land stewardship through interdisciplinary and applied research, education and policy. We are committed to serving public and private land managers through collaboration with our diverse network of partners to achieve science-based solutions to solve complex natural resource challenges. We are where conservation and applied research meet.
